## Yu-Neng (Allen) CHUANG

☐ (979) 334-0045 ♦ ☑ yc146@rice.edu Website: https://ynchuang.github.io

#### **EDUCATION**

Rice University

Houston, TX

Ph.D. in Computer Science (Advisor: Dr. Xia "Ben" Hu)

Aug. 2021 - Present

National ChengChi University

National ChengChi University

Taipei, Taiwan *Feb. 2018 - Jun. 2020* 

Master of Science in Computer Science

eu. 2010 - Jun. 2020

Bachelor of Science in Mathematical Sciences

Taipei, Taiwan Aug. 2013 - Jul. 2017

#### RESEARCH INTERESTS

• Uncertainty, Safety, and Explainability of Large Language Models (LLMs) • LLMs Reasoning and Alignment

• Multi-Agent Planning • Explainable AI

#### **EXPERIENCE**

Rice University

Houston, TX

#### Graduate Research Assistant

Aug. 2021 - Present

- Developed finetuning and alignment algorithms on uncertainty, explainability, and safety issues of LLMs
- Built efficient framework for LLMs on prompt compression for lower inference throughput and budgets
- Developed efficient explainable frameworks for generating ML models and LLMs

Apple Inc.

Cupertino, CA

#### Machine Learning Research Intern

May 2024 - Aug. 2024

• Developed uncertainty quantification algorithm for on-device LLMs based on confidence token prediction for instance routing and rejection learning purposes

#### Samsung Research America

Mountain View, CA

#### Research Intern

May 2023 - Aug. 2023

 Developed an efficient algorithm of hard prompt compression on large language models with LLM posttraining techniques, Proximal Policy Optimization (PPO), deducing 80% of LLM API usage cost and 20% of latency of white box LLMs

### Living Analytics Research Centre., Carnegie Mellon University and SMU

Singapore

Research Assistant

Jan. 2020 - Apr. 2020

• Built a ranking method for a personalized job recommendation system with TB-scaled user data in Singapore, which outperformed other state-of-the-art ranking methods by 10.2%

#### KKBOX Co, Ltd.

Taipei, Taiwan

#### Data Scientist Intern

Sep. 2019 - Jun. 2020

• Developed a ranking algorithm on a streaming dataset of nearly 1.5 million users to enhance the recommendation system by 15.3% compared with the prior internal recommendation systems

#### OPEN SOURCE PACKAGE

#### SMORe: Modularize Graph Embedding for Recommendation

• Developer. Constructed a large-scale network embedding library for recommendation systems on online streaming services which was developed under C++ with multi-thread processing techniques

#### LTSM-bundle: Large Time Series Models Training Library

• Project Leader. Designed the architecture of the training package, including the prompting design, tokenizer incorporation, and training paradigm.

# DiscoverPath: A Knowledge Refinement and Retrieval System for Interdisciplinarity on Biomedical Research (CIKM'23 Best Demo Paper Honorable Mention)

- Designed a KG-based retrieval system designed for biomedical research that aims to assist biomedical researchers in dynamically refining their queries and effectively retrieving articles.
- Project Leader. Designed the architecture of the system, encompassing comprehensive full-stack web development, database configuration, and algorithmic design
